TEACHER'S DAY

09:30 - 15:00, 4TH FEBRUARY 2013
UNIVERSITY OF LEEDS, LS2 9JT

The Royal Statistical Society Centre for Statistical Education (RSSCSE) and Winton Capital Management invite teachers to a day full of interactive practical ideas and activities for encouraging a better understanding of statistics.

WinAtSchool - A MATHS AND STATS COMPETITION

The RSSCSE and Winton Capital Management have launched an online statistics and mathematics national competition for all UK secondary schools that is fun and easy to enter with cash prizes for winning schools. This session showcases freely accessible hands-on and worksheet activities, covering many data handling topics.

Kate Richards, RSSCSE.

STATS IN THE NEWS

Making sense of the facts and figures about the world we live in is an essential life skill for making good decisions and wise choices. Unfortunately, much of what passes for statistics in the media is poorly presented and wrongly interpreted. Neil Sheldon will explore a series of examples, drawn from newspapers, broadcasting and the internet, highlighting the statistical concepts required for proper understanding.

Neil Sheldon, Manchester Grammar School, Chief Examiner in Mathematics for OCR.

THINKING STATISTICALLY AT GCSE

The aim of this session will be to explore how to help GCSE students understand statistics better through meaningful situations. The session will start with a short practical activity which can be used with GCSE students and look at how the data from it could be analysed. Further questions will then be explored using real data.

Stella Dudzic, MEI's programme leader for curriculum.

WinAtSchool - TEAM CHALLENGE

Delegates will have the opportunity to take part in a mock-up of the WinAtSchool National Final. This will use an audience response and voting system.

Kate Richards, RSSCSE.
